

Quick Start - RockWorks20, Network License - User Info

Server Setup

The network version requires installation of a license manager administrator program which is installed separately. We will email information about the license manager to the designated contact on your account.

Installing RockWorks20

You must have **Administrator** privileges to **install and license** RockWorks20. The RockWorks program should be installed onto each client computer. The program installs as a "Trial" version. RockWorks20 is a 64-bit application and requires a 64-bit version of Windows.

1. Visit www.rockware.com and click on the **Downloads | Demos** menu item, along the top of the page.
2. Scroll down to the **RockWorks** item and click the **Download** link.
3. On the next screen, fill in your **name** and **email**, click the **captcha** box, and click **Send**.
4. Click the **Download** link
5. **Save** the installation program to your computer.
6. When the download is complete, double-click on the installation file to **run** the installation. Follow the recommended installation settings.

* Network Administrator: You can install RockWorks silently using the \SILENT or \VERY SILENT command line parameters. See the Admin quick-start guide for details.

Licensing RockWorks20 *

1. When installation is complete, start the program. You'll see a window with the days/uses that remain in your fully-functional Trial period.
2. If you want to use the program in Trial mode, click the **Continue to RockWorks** button.
If you want to set up the licensing at this time, click the **Set Up Licensing** button.
(You can also access the licensing window using the License button at the top of the main RockWorks program window.)
3. In the **RockWorks Licensing window**, do this:
 - a. Click on the **Network** tab.
 - b. Enter the licensing information. This is typically supplied by your network administrator.
 - **Host:** Enter here the name or IP address of the server where the Network Licensing Service has been installed and is running.
 - **Port:** Type into this prompt the port number that the Licensing Service is using. This will default to 5280 but may have been changed by the network administrator when the Licensing Service was installed and set up.
 - **Protocol:** Select which IP Protocol is being used - version 4 or version 6.

! Tip: Click the **Listen for a Server** button to have RockWorks listen for the service across the network and fill in this information automatically.
4. Once the Host, Port, and Protocol have been entered, click the **Connect** button to connect to the license. If it is successful, you will see the Network license displayed on the Current License tab. The connection information will be stored for future use – you won't need to do this each time you want to run the RockWorks program.
5. Click the **Close** button to return to the program window. You'll see the license status in the lower-right corner of the program window (e.g. *RockWorks20– Network License Advanced*)
6. Borrowing a seat: If your network administrator has activated this feature, you may borrow a license for use on your computer when you are not connected to the network. Simply click the **Borrow a License** button in the Rockworks licensing screen. Set the date on which the temporary local license will expire, and click OK. RockWorks will then operate as a stand-alone license for this time period. When you return to the office, start RockWorks, click the License button at the top of the program window, and click the **Return License** button to check in your borrowed seat.

* Network Administrator: RockWare offers a console program to automate this licensing. See the Admin quick-start guide for details.

Getting Help

- Refer to the **Videos** tab in the main program window to access instructional videos.
- Run through the **Tutorial** lessons via the Help | Tutorials topics – click on the **?** Help button at the top-right corner of the program window.
- Refer to the **Instructions** tab which is displayed in each of the program's options window.
- Select the **?** Help | Contents menu option to access the **Help messages** for RockWorks.
- Join the online **support forum** where users post questions and answers, accessible via **?** Help | Support | User Group Forum.
- Contact our **technical support staff** at 303-278-3534, or email us at tech@rockware.com.
