

RockWare Network License Administrator Usage Log

The RockWare Network License Administrator writes a "UseageLog.txt" file which you can use to glean the user access to the license. This file is created on the server in C:\ProgramData\RockWare\License. The format looks like this:

```
20160822:173257,CHECKOUT,17,40619,"Maria","QUETZAL",20160822:233257
20160822:173315,CHECKIN,17,40619,"Maria","QUETZAL",20160822:233257
20160822:173319,CHECKOUT,17,42777,"Joe","PYRITE",20160822:233319
20160822:173325,CHECKIN,17,42777,"Joe","PYRITE",20160822:233319
```

The fields represent:

- Current DateTime on Server (local time)
- Command (see below)
- License ID (see below)
- Person ID (see below)
- User (Domain user)
- Machine (Domain computer)
- Start (DateTime of checkout) in UTC time

DateTime format: yyyyymmdd:hhmmss

Commands:

Invalid (invalid request),
Alive (heart beat),
Checkout,
Checkin,
Borrow (Request to borrow/loan a license),
Return (Return a borrowed/loaned a license),
Quit (Request to Disconnect from the server),
Status (Request of Status of Licenses),
ReqStatus (Request of Status of the pending license requests),
Request (Request for Installation number),
Activate (Activate a license),
Remove (Request a removal code),
DelRequest (Delete a request for Installation number),
Property (Setting a Server property)

License Id:

RockWorks 16 = 16	LogPlot 8 = 8	GIS Link 16 = 14
RockWorks 17 = 17		GIS Link 17 = 15

Person Id: arbitrary number assigned when connected to server, remains the same during the licensed session. A new checkout - a new number.
