

RockWorks20 Network License Setup

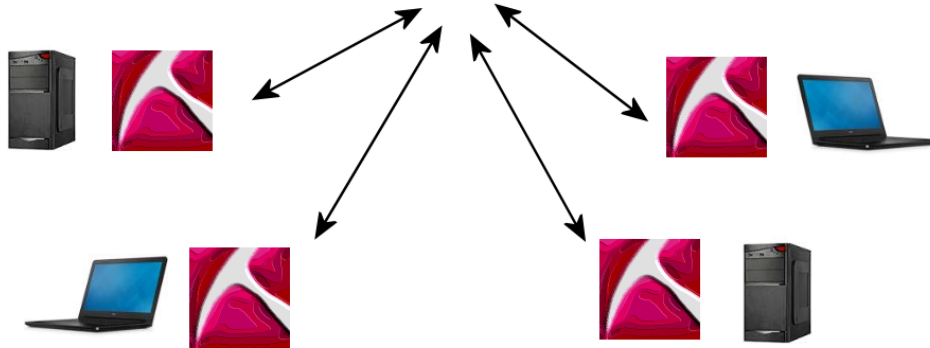

Status	Count	In Use	Product	Version	Features	Name	Registration Number	Maintenance Date
Active	2	0	RockWorks20	20.0	Advanced	(Your company name here)	RW20CNTXXX00000-xx	3/31/2022

localhost: 5280 Service is running License count: 3

RockWorks Network License
License is activated on a server (or other network computer) in the RockWare Network License Administrator program. It runs as a Service. Default Port = 5280

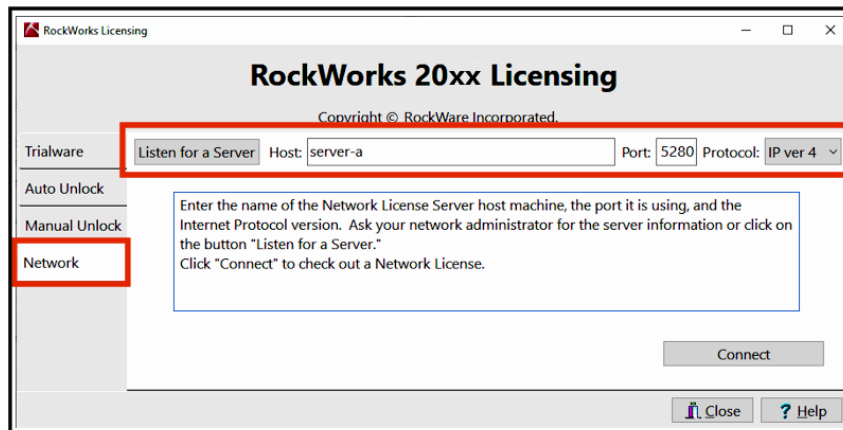

RockWorks20 program

RockWorks20 is installed on the users' local computers.

In the licensing screen, enter the server name (or IP), port, and protocol - this tells RockWorks how to ask for a license when the user starts the program.

Use the "Listen for a Server" button to fill this in automatically.
